

Lucky Pigeon

Pinball partnership proposal | Westfield Collective

WHO WE ARE

Lucky Pigeon is a proposed pinball venture led by **Ibrahim Turfanda**, a physician and pinball collector, with **Amy Bartee** as **project COO**. We aim to create shared experiences through approachable pinball.

THE VALUE FOR COLLECTIVE

A share of play revenue, without purchasing the machines. Lucky Pigeon would fund and operate the games; Collective would receive an agreed share of receipts.

An activity for families and friends. Four games could give guests another way to enjoy time together during a visit.

More ways to discover the venue. Once open, Collective and its current machine lineup could be listed on Pinball Map. Guest games and venue-approved gatherings could create additional reasons to visit; their effect would be measured.

POSSIBLE MACHINE MIX

Illustrative four-game lineup	Possible short-run guest games
Star Wars: Fall of the Empire Premium Transformers LE	Dune LE Metallica Remastered LE
Pokémon Premium Pokémon Pro	Bon Jovi LE

Dune, Metallica Remastered and Bon Jovi are sold-out limited runs. Short appearances could give guests a chance to play these sought-after titles. The lineup and rotation remain examples, subject to availability and agreement.

POSSIBLE GATHERINGS

Depending on interest and venue approval, we could explore International Flipper Pinball Association (IFPA) events or leagues, Belles & Chimes gatherings, Stern Army events, and new-game launch parties. Official affiliations and Stern Pinball support would require separate arrangements.

OPERATING APPROACH

Managed by Lucky Pigeon: installation coordination, maintenance, payments, player support and refunds. Routine play would be self-service, with direct operator support rather than Collective checkout.

Simple payment: proposed pricing of \$1 per game or \$2 for three, with independent cash and card/phone options.

PARTNERSHIP STRUCTURE

An operator-funded, revenue-sharing arrangement, with terms agreed together. Placement, power, access, insurance and service responsibilities would be confirmed before installation.

A joint review would consider actual receipts, uptime, guest feedback and operational fit.

PROPOSED NEXT STEP

A site walkthrough and discussion of venue priorities, suitable placement and terms for an initial operating period.

Prepared by Ibrahim Turfanda and Amy Bartee. Lucky Pigeon is a working venture name. This proposal is for discussion.
